Title VI Technical Assistance to Rural and Small Urban Providers

CalACT (California Association for Coordinated Transportation) / Caltrans

AMMA Transit Planning believes the Title VI planning process is a natural outgrowth of AMMA’s years of expertise in pro-active outreach, coordination and careful research and attention to analytics.

AMMA entered into a 2012 contract with CalACT to provide Title VI technical assistance and support to California’s transit providers with fewer than 50 fixed-route vehicles, including small urban and rural transit operators. This project is part of CalACT’s Rural Transportation Assistance Program on behalf of Caltrans. This technical assistance role involves:

- Becoming deeply familiar with the FTA 4702.1B guidelines for compliance for transit providers with less 50 or more fixed route vehicles that aren’t located in an Urbanized Area with a population of 200,000;
- Developing tools and template to assist transit operators in getting started and understanding and organizing what’s required;
- Compiling resources and reference materials for CalACT’s Title VI webpage;
- Presenting on this material at CalACT’s 2013 Spring Conference;
- Leading the August 2013 webinar that reiterated this material and how to get started;
- Providing on-going telephone technical assistance to transit operators throughout California.
